

Description Page Project - XEROX

language.html

This HTML page represents a **language selection interface** for the E-PRINT system. It appears right after the welcome screen and is designed to let users choose their preferred language before continuing.

Key Elements of the Page:

- **Main Heading:**
“*Select the language*” is displayed prominently at the top, along with a small translation icon, indicating multilingual support.
- **Language Options (Cards):**
Three visually styled selection cards are centered:
 - **ENGLISH**
 - **HINDI**
 - **MARATHI**Each card:
 - Uses a **bright coral/red background**
 - Has **rounded corners and modern UI styling**
 - Includes decorative yellow circular shapes for visual appealThese cards are likely **clickable buttons** that set the system language.
- **Instruction Text (Bottom Left):**
A helper message:
“*Select your preferred language to continue.*”
This guides the user clearly on what action to take.
- **Audio Button (Bottom Right):**
A **speaker icon button** is present, suggesting:
 - Voice assistance
 - Audio instructions for accessibility (useful for users who may not read easily)

Purpose of This Page:

- To **customize user experience based on language**
- To make the system **accessible and user-friendly**, especially in a local/public setup (like kiosks or print shops)

UX Insight:

This design is simple and effective:

- Large buttons → easy to click/tap
- Minimal text → avoids confusion
- Visual + audio support → inclusive design
