

# Description Page Project - XEROX

uploadprocess.html

## Key Elements of the Page:

- **Main Heading:**

*“Select the Document upload process”* clearly tells the user the next step in the workflow.

- **Upload Options (Center Icons):**

Three circular, visually consistent options are displayed:

1. **Folder / icon link :**

<https://i.supaimg.com/1fd8419f-3f55-4ace-b44b-876a112882c3/da06f84a-ad34-...>

- Represents selecting a file directly from the system (local storage)
- Likely opens a file picker dialog

2. **USB / icon link :**

<https://i.supaimg.com/1fd8419f-3f55-4ace-b44b-876a112882c3/bad70ce4-21b5-...>

- For accessing files from a USB drive
- Useful in kiosk or public computer environments

3. **TYPE-C / icon link :**

<https://i.supaimg.com/1fd8419f-3f55-4ace-b44b-876a112882c3/db2324d9-2b3e-...>

- Suggests connection via **Type-C cable (mobile device)**
- Could allow direct file transfer from phone

- Each option:

- Is enclosed in a **circular outline**
- Uses minimal icon-based design
- Is likely **clickable/touch-enabled**

- **Instruction Text (Bottom Left):**

Two helpful points:

- *“Select your suitable device to upload the digital document”*
  - *“Choose document type and follow simple steps for printing.”*
- These guide the user through the process in simple terms.

- **Audio Button (Bottom Right):**

- A **speaker icon button** again indicates **voice assistance**
- Ensures accessibility for users unfamiliar with reading or UI navigation

## Purpose of This Page:

- To let users choose **how they will upload their document**
- To support **multiple input sources**, making the system flexible
- Designed especially for **public kiosks / print stations**

## UX Insight:

- Icon-based selection → easy for all users (even non-technical)
- Multiple device support → practical real-world use

- Clean layout → reduces confusion and speeds up interaction
