

Description Page Project - XEROX

welcome page.html

version1.1

commit message : “The welcome.html V.1.1”

This HTML page is designed as a **clean, modern landing screen** for a printing application called “**E-PRINT.**”

Here’s what it represents:

- **Main Heading:**

The page prominently displays “*Welcome to E-PRINT*”, indicating it’s the entry point of the application.

- **Instruction Text:**

A short line below guides the user: “*Click to Start button for printing !!*” – making the purpose immediately clear.

- **Call-to-Action Button:**

A visually appealing “**Start**” button is placed at the center.

- It uses a **gradient color (purple → yellow/orange)**, which makes it stand out.
- This button is likely meant to **initiate the printing process or navigate to the main app interface**.

- **Design & Styling:**

- **Background image link :**

- <https://i.supaimg.com/d0495ff2-7a2f-426d-a287-7b3b2861a5ee/e6ab6924-7751-453...>

- The background is **minimal and light**, keeping focus on content.
- Colorful **abstract wave shapes** appear in the corners, giving a **modern UI/UX feel**.
- A **large arrow graphic** at the bottom visually points toward the Start button, guiding user attention.

- **User Experience Intent:**

- Very simple, beginner-friendly interface
- Focused on **one action → Start printing**
- Likely used in environments like **cyber cafes, print kiosks, or student systems**
